

System and Proposal Engineer- Brunei

Company Description

Page Asia Pacific specializes as a telecom and security systems integrator and service provider. Its primary focus encompasses the installation, site supervision, commissioning and maintenance of telecom systems across three key sectors: Oil & Gas, Critical Infrastructure Protection and Defense.

Work Position

We are looking for:

We are looking for a talented and motivated **System and Proposal Engineer** to join our multicultural team and willing to work in a dynamic and innovative environment with a focus on cutting-edge technology. The successful candidate will play a pivotal role in both the proposal and project teams, supporting tender preparation and project delivery.

The selected resource will work in Bandar Seri Begawan, Brunei Darussalam, with availability to travel to all four districts and overseas.

Expected Activities:

The candidate will be expected to:

- design and develop telecom and security systems that meet required specifications and standards
- perform system integration, testing and validation to ensure seamless operation.
- collaborate with project teams during the implementation phase to ensure projects are delivered on time and within budget.
- develop detailed technical documentation and system manuals to support ongoing maintenance and future upgrades.
- stay updated with the latest technological advancements in telecom and security systems to propose innovative solutions and improvements.
- analyze tender technical documentation, identify compliant solutions, review offers from suppliers and subcontractors and prepare comparative cost analyses.

- build and track the proposal compliance matrix to ensure the fulfillment of all requirements for engineering development items within the proposal.
- prepare technical responses to tenders.
- establish and maintain efficient relationships with vendors.

In addition, must be able to work under pressure and be able to work by deadlines.

Requirements and Skills

- 2+ years of experience in system or proposal engineering
- background in telecom and security systems.
- excellent written and verbal communication skills.
- ensure accuracy, completeness, and compliance of technical documentation.
- ability to work under tight deadlines and manage competing priorities.
- proficiency with MS Office Suite.
- proactive, detail-oriented individual
- uphold the core values of Integrity, Commitment, Excellence, and Teamwork
- interested in delivering high-quality technical solutions

More Information

What we offer:

- Contract: yearly renewable basis
- Pay: \$1800-\$2800/month (depending on experience and qualifications)
